

Dossier Information System (D.I.S) is a registered product of Intellinet Technologies and is designed to meet the requirements for information flow between the classroom, School, Education Authority (EA) and the Regional Management Office Registration (RMO).

Functioning as an information database and report generator for existing reporting requirements of INAC, Dossier has a comprehensive Individualized Program Plan (IPP) function to manage the special education program in schools.

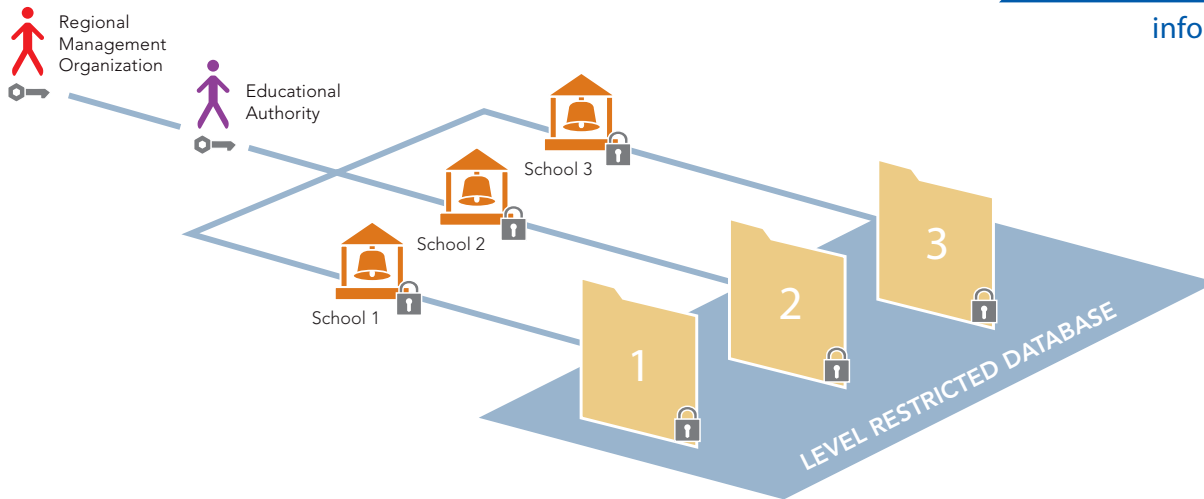

Dossier is a web-based program with a user-friendly interface, designed with the end user in mind.

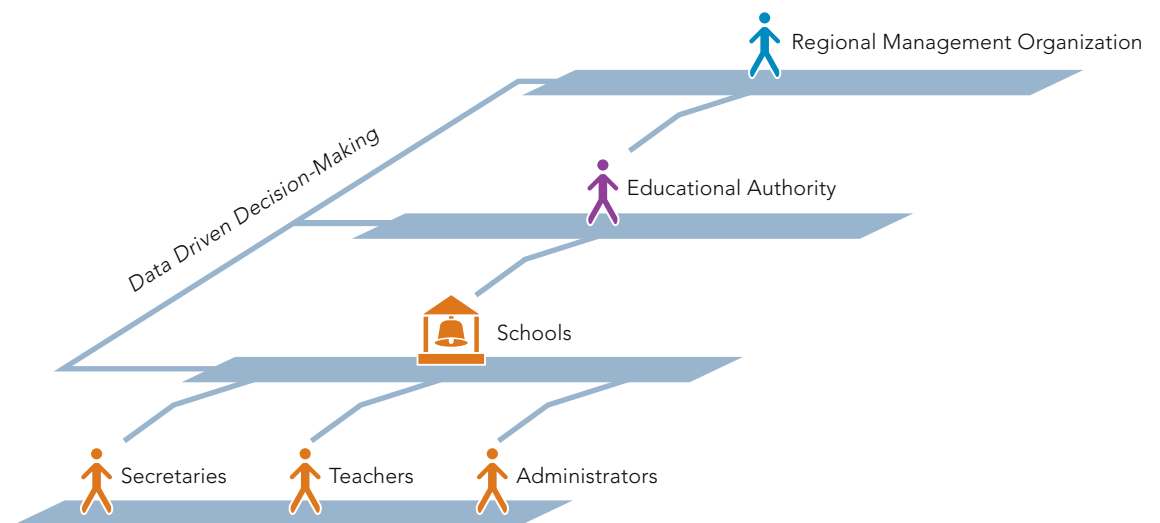

Intellinet Technologies is an IT service and consulting firm. Our organizational objective is to assist companies and schools in improving their operational capabilities by equipping them with the appropriate information technology tools.

Intellinet maintains and supports the technology investments of its clients by providing technical support services as well as training. In addition to technical support, Intellinet provides customized software solutions.

Security Level Access

Flow of Information

FEATURES
